ABOUT THE LOCATION
William Shakespeare. Charles Darwin. Winston Churchill. Margaret Thatcher. Jolly old England has been home to some of the world’s greatest thinkers, creators, and leaders. London’s history stretches back to the Romans, and it is easy to travel through time here (e.g., when you’re investigating the ancient megaliths of a 5,000-year-old stone circle!) A contemporary global city, London is home to almost 9 million people from all over the world, is a major financial center, and beholds a rich arts scene that includes some of the best theater, music, and fashion Europe has to offer. Students will enjoy learning about and discovering London’s extraordinary past and vibrant and eclectic present.

PROGRAM OVERVIEW
Experience London through the School of Engineering’s custom study abroad program while you earn credit toward your Engineering degree requirements. You will take Differential Equations and a class that fulfills your humanities or social science requirement in one of Europe’s most vibrant cities. Located in Bloomsbury, the academic quarter of London, this specially designed program will hold classes in a facility with all the amenities you need. This four week study opportunity is the perfect blend of intensive study and local exploration.

APPLICATION DEADLINE: March 23, 2019

PROGRAM FEE & ELIGIBILITY
